cloud based document control platform that ties together digital and paper

work collaboratively on drawings the way you want.

Markup drawings at the job site and instantly have the changes made to the host file, effortlessly.

iMarkups

iMarkups is a cloud based document management tool for true collaboration that syncs together both digital and paper documents. It syncs any documents downloaded from your iMarkups cloud account with a unique fingerprint.

Any document that is printed from the cloud gives your project team the ability to markup, change, notate directly on the paper document with the iMarkups pen. Your hand written comments or revisions on paper will automatically sync to your project cloud account. Alerts and a digital copy of the markup are emailed to those involved.

WITH YOU EVERY STEP OF THE WAY
